PROFILE

Digital Systems & Automation Engineer with hands-on experience building web platforms, workflow automations, CRM integrations, and SMS communication systems for businesses and agencies. Skilled in translating complex processes into efficient, scalable solutions using tools such as WordPress, GoHighLevel, Zapier, Make, Twilio, and Excel-based logic. Strong analytical background in statistics and data analysis, with a practical, results-driven approach to system design and problem-solving.

PROJECTS

Zapier/Trello/NetSuite Intergration

12/2025 – Present

Designed and implemented a Zapier integration between NetSuite and Trello to automatically create project cards, populate custom date fields, assign checklist item due dates, tag sales representatives, and sync project data for streamlined project tracking and execution.

Restaurant Website with Online Booking

Tools: WordPress, Elementor, CSS

Emmanuel Adegbayi O., emmanueladegbayi@gmail.com

PROFESSIONAL EXPERIENCE

Freelance Web Developer & Automation Specialist

2022 – present

- Designed and developed responsive, SEO-friendly websites using **WordPress**, optimizing for user experience and conversion.
- Implemented **Twilio** and **Vonage SMS automation systems** for small businesses, improving customer communication and engagement.
- Integrated **GoHighLevel CRM** workflows and automated client follow-ups, leading to a 30% boost in lead retention for some clients.
- Set up **Twilio IVR systems**, ensuring seamless call routing and customer service automation.
- Developed **data dashboards in Excel** to track marketing campaign performance, including SMS response rates and website traffic.
- Collaborated with coaches, agencies, and small business owners to deliver custom solutions tailored to their goals.
- Managed **A2P 10DLC registration** and compliance for clients to ensure deliverability and legal messaging.

Freelance | Remote

Project Management & Workflow Automation Specialist

2022 – Present

- Planned, executed, and delivered multiple client projects across web development, automation, CRM setup, and SMS marketing within defined timelines and scopes.
- Translated client requirements into structured task breakdowns, milestones, and delivery phases using **Trello** and checklist-based workflows.
- Designed and managed **Trello boards and templates** to track progress, dependencies, and completion status across projects.
- Coordinated project activities between tools and platforms (WordPress, GoHighLevel, Zapier, Make, Twilio), ensuring smooth handoffs and system reliability.
- Managed change requests, clarified scope, and adjusted workflows to maintain delivery quality without timeline slippage.
- Communicated project updates, blockers, and resolutions clearly to non-technical clients.

Contract / Project-Based

Trello Workflow & Process Design Consultant

12/2025 – Present

- Built and customized **Trello project management systems** for agencies and teams to improve task visibility and accountability.
- Automated task creation, checklist duplication, and status updates using **Trello Butler** and third-party automation tools.
- Simplified complex project flows into reusable templates, reducing setup time for recurring projects.

- Designed and developed a fully responsive website for a local restaurant, featuring pages like *Menu*, *Catering*, *Banquet Facility*, *Gallery*, and *Online Booking*.
- Integrated custom forms and a booking system to streamline customer reservations.
- Improved user engagement and increased online bookings within 2 months.

SMS Marketing Automation for E-commerce Brand

Tools: Twilio, GoHighLevel, Zapier

- Built an automated SMS workflow for cart abandonment, order updates, and customer re-engagement.
- Set up **Twilio A2P 10DLC** registration and compliance.
- Achieved an increase in repeat purchases through targeted follow-up campaigns.

Shopify Store Optimization & Multi-Channel Expansion

12/2025 – 01/2026

Led end-to-end optimization of a custom awards Shopify store, including conversion-focused product page redesign, SEO for high-value product categories, automation improvements, and expansion to Etsy and TikTok Shop through fully optimized product listings. Focused on increasing discoverability, conversions, and cross-platform sales performance.

ICT Intern – Independent National Electoral Commission (INEC)

Industrial Training (SIWES)

07/2024 – 12/2024 | Akure, Nigeria

- Configured and managed **BVAS devices**, including charging, reactivation, software installation, and data clearance for multiple local governments and voting units.
- Conducted **quality assurance (QA)** checks to prevent configuration errors across election devices.
- Organized and validated large datasets of staff and voter records using **Microsoft Excel**, including serial number tracking and data computation.
- Supported the ICT team in deployment readiness and post-configuration verification.
- Assisted the Head of Department with **data analysis tasks**, improving accuracy and record consistency.

Data Analyst & Automation Consultant (Freelance)

- Conducted end-to-end data analysis for small businesses and agencies, using **Excel** and statistical methods to uncover insights that informed marketing and operational strategies.
- Collected, cleaned, and visualized data from website traffic, SMS campaigns, and CRM platforms to track KPIs and recommend performance improvements.
- Built and maintained **automated reporting dashboards**, enabling clients to monitor campaign effectiveness and customer engagement in real time.
- Integrated data from **Twilio**, **GoHighLevel**, and third-party tools to streamline lead tracking and communication workflows.
- Assisted in the **design and deployment of automated IVR systems** using Twilio, contributing to reduced call center workload and improved customer satisfaction.
- Ensured compliance with industry standards by supporting **A2P 10DLC registration** and message routing verification for U.S. clients.

Freelance | Remote

Web-Based Calculator & Pricing System Developer

09/2025 – Present

- Converted complex **Excel and Google Sheets pricing logic** into interactive **web calculators** and dynamic pricing systems.
- Built pricing tools that update across multiple pages of a website using shared logic and stored user inputs.
- Collaborated with clients to define pricing rules, edge cases, and calculation flow before development.
- Improved user experience by simplifying technical pricing structures into easy-to-use interfaces.
